

CURRICULUM

The Teacher as a Knower of Curriculum

Jundelle Marie S. Bagioen / jmbagioen@gmail.com / February 2017

THE TEACHER AS A KNOWER OF CURRICULUM

1. The School Curriculum: Definition, Nature and Scope
2. Approaches to School Curriculum
3. Curriculum Development: Processes and Models
4. Foundations of Curriculum Development

THE SCHOOL CURRICULUM:
DEFINITION, NATURE AND SCOPE

"Curriculum is a **planned and guided set of learning experiences and intended outcomes**,

– Daniel Tanner, 1980

"It is a **written document** that **systematically describes goals planned, objectives, content, learning objectives, evaluation procedures** and so forth."

-Pratt, 1980

"The **contents of a subject**, concepts and tasks to be acquired, **planned activities**, the **desired learning outcomes and experiences, product** of culture and an agenda to reform society make up a curriculum."

-Schubert, 1987

"… includes **all of the experiences** that individual learners have in a program of education **whose purpose is to achieve broad goals and related specific objectives**, which is **planned in terms of a framework of theory and research** or past and present professional practice."

-Hass, 1987

"It is a ***programme of activities*** (by teachers and pupils) designed so that ***pupils will attain*** so far as ***possible certain educational*** and other schooling ***ends or objectives***."

-Grundy, 1987

"It is ***a plan*** that consists of learning opportunities for a specific time frame and place, ***a tool that aims to bring about behaviour changes in students as a result of planned activities*** and includes all learning experiences received by students with the guidance of the school."

_Goodland and Su,1992

"It provides answers to **three (3) questions:**

1. What knowledge, skills and values are most worthwhile?
2. Why are they most worthwhile?
3. How should the young acquire them?

- Cronbeth, 1992

TRADITIONAL

PROGRESSIVE

CURRICULUM

TRADITIONAL

CURRICULUM

CURRICULUM FROM TRADITIONAL POINT OF VIEW

Robert M. Hutchins

Arthur Bestor

Joseph Schwab (1909–1988)

Joseph Schwab

Philip Phenix

CURRICULUM FROM TRADITIONAL POINT OF VIEW

Robert M. Hutchins

"PERMANENT STUDIES" where rules of grammar. Reading, rhetoric, logic and mathematics for basic education are emphasized

3Rs

Reading, W**r**iting, '**R**ithmetic

CURRICULUM FROM TRADITIONAL POINT OF VIEW

Arthur Bestor

The **mission of the school should be intellectual training,** hence curriculum **focus on the fundamental intellectual disciplines of grammar, literature and writing.** (Math, Science, History and foreign language)

CURRICULUM FROM TRADITIONAL POINT OF VIEW

Joseph Schwab (1909–1988)

Joseph Schwab

The sole source of curriculum is a **discipline** (a ruling doctrine for curriculum development.)

English, Math, Social Studies, English and many more

Humanities, Sciences, Languages, Mathematics (College)

CURRICULUM FROM TRADITIONAL POINT OF VIEW

Philip Phenix

Curriculum should **consist** entirely of **knowledge which comes from various disciplines.**

PROGRESSIVE

CURRICULUM

CURRICULUM FROM PROGRESSIVE POINT OF VIEW

- John Dewey
- Holin Caswell
- Kenn Caswell
- Othaniel Smith
- William Stanley
- Halan Shore
- Colin Marsh
- George Willis

CURRICULUM FROM PROGRESSIVE POINT OF VIEW

John Dewey	• EDUCATION IS EXPERIENCING. • **Reflective Thinking is a** means that **unifies curricular elements** that are **tested by application.**
Holin Caswell **Kenn Caswell**	• Curriculum as **ALL experiences children** have **under the guidance of teachers**.

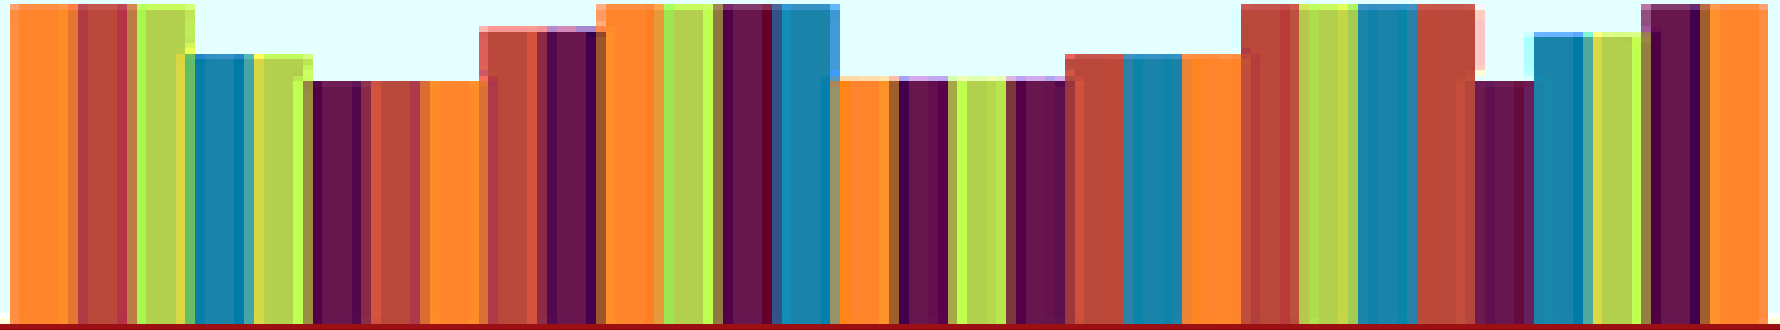

CURRICULUM FROM PROGRESSIVE POINT OF VIEW

Othaniel Smith William Stanley Halan Shore	• Curriculum as a **sequence of potential experiences**, **set up** in schools **for** the purpose of **disciplining children and youth** in group ways of thinking and acting.
Colin Marsh George Willis	• Curriculum as **all the experiences in the classroom** which are **planned and enacted by the teacher** and also **learned by the students.**

SUMMARY

Curriculum is what is taught in school, a set of subjects, a content, a program of studies, a set of materials, a sequences of courses, a set of performance objectives, everything that goes within the school. It is what is taught inside and outside of school directed by the teacher, everything planned by school, a series of experiences undergone by learners in school or what individual learner experiences as a result of school. In short, Curriculum is the total learning experiences of the learner, under the guidance of the teacher.

CURRICULUM

Approaches to School Curriculum

THREE WAYS OF APPROACHING THE CURRICULUM

1. Curriculum as a Content
2. Curriculum as a Process
3. Curriculum as a Product

CURRICULUM AS A CONTENT OF BODY AND KNOWLEDGE

FOUR WAYS OF PRESENTING THE CONTENT IN THE CURRICULUM

- **Topical approach -**content is based on knowledge and experience
- **Concept approach -** with fewer topic in cluster
- **Thematic approach -** combination of concepts
- **Modular approach -** completes unit of instruction

GUIDE IN THE SELECTION OF THE CONTENT IN THE CURRICULUM

- commonly used in **daily life**
- **appropriate** to the **maturity levels** and the **abilities** of learners
- **valuable in meeting the needs and competencies** of the future career
- **related to other subject field** or discipline for **complementation** and **integration**
- important in the **transfer of learning** in other disciplines

BASIC PRINCIPLES OF CURRICULUM CONTENT

- **Balance-** content should be fairly distributed in depth and breadth.
- **Articulation-** assure no gaps in content
- **Sequence -** arrangement of content
- **Integration -** content does not stand alone or in isolation
- **Continuity -** content when viewed should continuously flow as it was before

CRITERIA FOR THE SELECTION OF CONTENTS

- Significance
- Validity
- Utility
- Learnability
- Feasibility
- Interest

CRITERIA FOR THE SELECTION OF CONTENTS

- **Significance**
  - Should contribute to ideas, concepts, principles and generalization that should attain the overall purpose of the curriculum
  - Cognitive, Affective or Psychomotor Skills

CRITERIA FOR THE SELECTION OF CONTENTS

- **Validity**
  - Authenticity
  - Need for validity check and verification

CRITERIA FOR THE SELECTION OF CONTENTS

- **Utility**
  - Relative to the learners, time
    - *Will I use this in my future job?*
    - *Will it add meaning to my life as a lifelong learner?*
    - *Will the subject matter be useful in solving current concerns?*

CRITERIA FOR THE SELECTION OF CONTENTS

- **Learnability**
  - Should be within the range of experiences of the learners
  - Content standards and Sequencing of Contents

CRITERIA FOR THE SELECTION OF CONTENTS

- **Feasibility**
  - *Can the content be learned within the time allowed, resource available, expertise of the teachers and the nature of the learners?*
  - *Are there contents of learning which can be learned beyond the formal teaching-learning engagement?*
  - *Are there opportunities provided to learn these?*

CRITERIA FOR THE SELECTION OF CONTENTS

- **Interest (DRIVING FORCE of the Students)**
  - *Will the learners take interest in the content? Why?*
  - *Are the contents MEANINGFUL?*
  - *What VALUE will the contents have in the present and future life of the learners?*

CURRICULUM APPROACH AS A PROCESS

GUIDING PRINCIPLES

- Curriculum process:
  - the form of teaching methods or strategies are means to achieve the end.
  - There is **NO SOUND BEST PROCESS** or method
  - should stimulate the learners desire to develop the cognitive, affective and psychomotor domains in each individual
  - **Every methods or prices should result to learning outcomes**
  - Flexibility in the use of prices or method should be considered.
  - Both teaching and learning are the two important process in the implementation

CURRICULUM AS A PRODUCT

- Product is what the students desire to achieve as a learning outcomes.

(Product/Performance)
