INTERVIEW GUIDE QUESTIONS

Introduction:

Good day!

We, Princess Años, Roger Brioso Jr., Dessa Jane Quebral, JM Subteniente, Jessie Manuel Telmo, and Sherwin Tilos, third-year BSED Science students of Davao Del Norte State College, are conducting our research entitled, **Unveiling the Perceptions and Experiences of Second-Year BSED Science Students Towards Alternative Incubator as Laboratory Apparatus.**

We kindly request your permission to record the upcoming conversation, with a focus on capturing your responses. This interview is part of our study, which is to explore the students' experiences in Microbiology and Parasitology, particularly their perceptions and insights regarding the use of the alternative incubator during laboratory activities and how it influenced their learning. Please be assured that your privacy and the confidentiality of your answers will be strictly maintained by assigning aliases to you and all other interviewees.

Thank you for agreeing to participate in this interview. Have you received a copy of the informed consent form? Your participation is entirely voluntary, and your consent confirms that you understand your role and obligations in this study. You may skip any question or ask for clarification at any time. The interview will take approximately 60 to 70 minutes, and all responses will be kept strictly confidential under the Data Privacy Act of 2012 (RA 10173). Only the researchers will have access to the information collected, and pseudonyms will be used to protect your identity. You may elaborate on your answers as much as you wish. Your responses will provide valuable insights into the effectiveness

and relevance of the alternative incubator in laboratory learning. If you have no questions, may we proceed?

First, we are student-researchers from Davao del Norte State College, currently pursuing a Bachelor of Secondary Education, Major in Science, and we are conducting this study as part of our research process. Throughout this interview, we will ask questions about your perceptions and experiences using the alternative incubator as a laboratory apparatus during your Microbiology and Parasitology laboratory activities. Your responses will be recorded through field notes and an audio-recording device; however, please be assured that both your identity and your answers will remain strictly confidential and will not be linked to any individual cases.

This study seeks to uncover the perceptions and experiences of second-year BSEd Science students towards the alternative incubator as a laboratory apparatus, and your responses will provide valuable support for the findings of our qualitative phase, which has already been completed. Do you have any questions before we begin? If none, let us get started. Kindly state your name, year level, and section.

Institute of Teacher Education

Research Question: What are the experiences of second-year BSEd Science students in using the standard incubator during laboratory activities in Microbiology and Parasitology?

Sub-question 1: How would you describe your experiences when using the standard incubator during your Microbiology and Parasitology laboratory activities?

Sub-question 2: What were your first impressions when you started using the standard incubator?

Sub-question 3: Can you describe how you used the standard incubator during laboratory activities?

Probe question:

- What specific tasks did you perform using it?

Sub-question 4: How did your experience with the standard incubator influence your understanding of the subject matter?

Probe questions:

- In what ways did it affect your engagement during laboratory activities?
- How did it influence your participation in the activities?

Sub-question 5: What challenges or difficulties did you encounter while using the standard incubator?

Probe question:

- How did you respond to or manage those challenges?

Research Question: What are the perceptions of second-year BSEd Science students regarding the alternative incubator prior to its utilization in laboratory activities?

Institute of Teacher Education

Sub-question 1: When you first heard about the alternative incubator, what were your initial thoughts about it?

Sub-question 2: What expectations did you have regarding the performance or reliability of the alternative incubator before trying it?

Sub-question 3: Before using it, what advantages or possible limitations did you anticipate the alternative incubator might have for your laboratory activities?

Sub-question 4: What concerns or hesitations did you have about using the alternative incubator before trying it?

- How would you describe your concerns about the reliability or accuracy of the alternative incubator?

Sub-question 5: Before using it, how did you think the alternative incubator would compare to the standard laboratory incubator in terms of effectiveness?

- How about in terms of safety?

Research Question: What are the insights of second-year BSEd Science students regarding the perceived effectiveness and influence of the alternative incubator after using it in their Microbiology and Parasitology laboratory activities?

Sub-question 1: How would you evaluate your overall experience using the alternative incubator during your Microbiology and Parasitology laboratory activities?

Sub-question 2: How did the alternative incubator meet your expectations in terms of its performance?

Probe questions:

- How would you describe the microbial growth results it produced?
- How did you find its ease of use compared to what you expected?

Institute of Teacher Education

Sub-question 3: In what ways did the alternative incubator limit the laboratory process compared to what you are accustomed to?

Probe question:

- Did it affect your engagement during the laboratory activity?

Sub-question 4: What strengths or advantages did you notice while using the alternative incubator?

Probe question:

- How did it contribute to the development of your hands-on laboratory skills?

Sub-question 5: Based on your experience, how would you compare the alternative incubator to the standard incubator?

Probe question:

- Would you recommend its use in future laboratory classes? Why or why not?

Outro: This concludes our interview. Do you have any questions or need any clarifications regarding the study? If not, we would like to thank you for taking the time to participate in this interview. Your responses are greatly appreciated and will contribute meaningfully to this research study. Rest assured that all information provided will be treated with confidentiality and used solely for academic purposes. Your participation has been valuable to the success of this study. For further clarification, please don't hesitate to email us at años.princess@dnsc.edu.ph.brioso.rogerjr.@dnsc.edu.ph.quebral dessajane@dnsc.edu.ph.subteniente.jm@dnsc.edu.ph.telmo.jessiemanuel@dnsc.edu.ph.tilos.sherwin@dnsc.edu.ph. Thank you so much.
