EVALUATION FORM (USERS)

Name: _____ **Date:** _____

Thank you for participating in this short survey to help us determine the quality of the capstone project entitled **IMAGE-CENTRIC NUTRITIONAL INTELLIGENCE AND PREVENTIVE APP FOR CHRONIC KIDNEY DISEASE MANAGEMENT**

Rest assured that any personal information collected for this survey, including your name, will be used exclusively for this study and treated with strict confidentiality.

This survey contains several questions to be rated from one (1) to five (5), where one (1) is the lowest and five (5) is the highest. Please rate the following statements based on your experience using the app.

Please check your desired choice. The scale is described as follows:

Rating	Description
5	Strongly Agree
4	Agree
3	Fairly Agree
2	Disagree
1	Strongly Disagree

	5	4	3	2	1
FUNCTIONAL SUITABILITY					
1. The app accurately classifies food items using image recognition.					
2. The app correctly displays calorie, sugar, and sodium content.					
3. The app calculates recommended intake based on BMI.					
4. The app provides alerts when intake exceeds limits.					
5. The app accurately tracks and records water intake.					
6. The app provides real-time hydration reminders.					
7. The app allows users to upload food images easily.					
8. The app allows adjusting food quantity after scanning.					
9. The app allows manual food entry when needed.

Institute of Computing

10. The app consistently retrieves and displays accurate locations of nearby nephrology centers around Davao, Tagum, and Panabo without errors.					
PERFORMANCE EFFICIENCY					
11.The app processes food images quickly.					
12. The app displays results in real time.					
13. Notifications are delivered without delay.					
14. The application loads quickly.					
15. The app responds quickly to users' actions.					
USABILITY					
16.The interface is easy to navigate.					
17. The food scanning feature is user-friendly.					
18. The app clearly displays nutritional information.					
19. Intake summaries (daily/weekly/monthly/yearly) are easy to understand.					
20. The app clearly shows filtered summaries (calories, sugar, sodium).					
RELIABILITY					
21.The app consistently records food intake accurately.					
22. The app consistently records water intake accurately.					
23. The application runs without crashes during normal use.					
24. The app performs consistently over time.					
SECURITY					
25. The app protects sensitive users' health and nutritional data on mobile devices.					
26. Users' information is kept confidential.

MAINTAINABILITY					
27. The app is easy to update and improve on Android Devices.					
28. App issues can be easily identified and resolved.					
29. The app supports continuous improvements.					
COMPATIBILITY					
30. The app runs properly on different Android mobile devices.					
31. The app works depending on internet conditions.					
32. The app coexists with other applications without any problems or issues.					
PORTABILITY					
33. The app can be installed properly.					
34. The app maintains its functionalities after updates.					
35. The app can be transferred and used to another android device easily.					
36. The app adapts to different android device specifications.

EVALUATION FORM (ADMIN)

Name: _____ **Date:** _____

Thank you for participating in this short survey to help us determine the quality of the capstone project entitled **IMAGE-CENTRIC NUTRITIONAL INTELLIGENCE AND PREVENTIVE APP FOR CHRONIC KIDNEY DISEASE MANAGEMENT**

Rest assured that any personal information collected for this survey, including your name, will be used exclusively for this study and treated with strict confidentiality.

This survey contains several questions to be rated from one (1) to five (5), where one (1) is the lowest and five (5) is the highest. Please rate the following statements based on your experience using the app.

Please check your desired choice. The scale is described as follows:

Rating	Description
5	Strongly Agree
4	Agree
3	Fairly Agree
2	Disagree
1	Strongly Disagree

	5	4	3	2	1
FUNCTIONAL SUITABILITY					
1.The system displays users' data accurately.					
2. The system effectively notifies administrators of newly scanned food entries.					
3. The system accurately displays filtered users' data for admin review.					
4. The system generates reports (Excel/Print) correctly.					
5. The system displays summaries (daily, weekly, monthly, yearly).					
6. The system allows admin to configure reports.					
7. The system accurately displays compliance graphs showing the percentage of users' meeting their required water, calorie, sugar, and sodium intake.

PERFORMANCE EFFICIENCY					
8. The dashboard responds quickly when accessed by admin.					
9. The system generates reports (Excel/Print) within acceptable time.					
10. The system handles multiple simultaneous users' actions efficiently.					
11. Compliance graphs and summaries update in real-time or near real-time.					
12. The system adapts performance to varying internet connectivity.					
USABILITY					
13. The dashboard allows admin to easily find and access all features.					
14. The layout supports efficient monitoring and decision-making on the web.					
15. The web interface is clear, intuitive, and easy to use.					
16. Instructions and labels on the web are straightforward and understandable.					
17. The system provides timely and useful feedback for admin actions.					
RELIABILITY					
18. The system consistently loads the admin dashboard without errors.					
19. Reports (Excel/Print) are generated correctly every time.					
20. Compliance graphs for water, calorie, sugar, and sodium intake display accurately.					
21. Users' data is reliably retrieved and displayed without loss or corruption.					
22. Filtered views of users' data consistently show accurate results.					
23. The system is available when needed.

SECURITY					
24. The system protects sensitive users' health and nutritional data on the web.					
25. The system prevents unauthorized access to users' records and reports.					
26. The system ensures secure authentication of users.					
27. The system maintains secure session management, including logout and session timeouts.					
28. Access to admin functions is restricted based on roles and permissions.					
MAINTAINABILITY					
26. The system is easy to update and improve on the web interface.					
27. System issues can be easily identified and resolved in the admin dashboard.					
28. Admin functions, such as report configuration, can be modified smoothly.					
29. The system supports continuous improvements to features and modules.					
30. Admin can easily navigate and manage the system.					
COMPATIBILITY					
31. The web system works correctly across major browsers (Chrome, Firefox, Edge).					
32. The system displays properly on different screen resolutions and monitor sizes.					
33. Admin functions perform consistently across supported browsers.					
34. Reports and graphs render correctly on all compatible browsers.					
35. The system maintains performance on different operating systems (Windows, macOS).

Institute of Computing

PORTABILITY					
36. The system allows easy migration of user data and configurations without downtime.					
37. The system can be set up easily in different web environments.					
38. The system adapts well to various hardware and monitor configurations.					
39. The system maintains consistent functionality after updates or environment changes.
